CALENDAR – ANNIVERSARIES

- 11 March 1975 - 40 years since Eugen Bădărău death**, was a Romanian physician, professor, director of the Institute of Physics from Bucharest, member of the Romanian Academy (1948). He is considered the founder of the Romanian school of electrical discharges in gases and plasma physics. (19 October 1887 – 11 March 1975).
-
- 13 March 1865 – 150 years since Dragomir M. Hurmuzescu birth**, was an Romanian physicist, inventor, professor at the University of Iași and the University of Bucharest, member of the Romanian Academy, founder of electrical engineering education in Romania, collaborator Marie and Pierre Curie spouses (13 March 1865–31 May 1954).
-
- 27 March 1845 – 170 years since Vilhelm Conrad Röntgen birth**, was a German physicist, who, on 8 November 1895, produced and detected electromagnetic radiation in a wavelength range known as X-rays or Röntgen rays, an achievement that earned him the first Nobel Prize in Physics (27 March 1845 – 10 February 1923)
-
- 11 April 1830 – 185 years since Emanoil Bacaloglu birth**, was a Romanian physicist, chemist and mathematician with the first Romanian scientific papers in mathematics, physics and chemistry, thereby contributing to Romanian language terminology in these areas. He was a professor of physics at the University of Bucharest and member of the Romanian Academy in 1879. (11 April 1830 - 30 August 1891).
-
- 18 April 1955 - 60 years since Albert Einstein death**, was a German-born theoretical physicist. He developed the general theory of relativity. Einstein's work is also known for its influence on the philosophy of science. He received the 1921 Nobel Prize in Physics for his “*services to theoretical physics*” (14 March 1879 – 18 April 1955).
-
- 25 April 1840 - 175 years since Siméon Denis Poisson death**, was a French mathematician, geometer, and physicist. He obtained many important results, but within the elite Académie des Sciences he also was the final leading opponent of the wave theory of light and was proven wrong on that matter by Augustin-Jean Fresnel (21 June 1781-25 April 1840).
-
- 25 April 1900 - 115 years since Wolfgang Ernst Pauli birth**, was, an Austrian-born Swiss theoretical physicist and one of the pioneers of quantum physics. In 1945, after having been nominated by Albert Einstein, Pauli received the Nobel Prize in Physics for his “*decisive contribution through his discovery of a new law of Nature, the exclusion principle or Pauli principle*”. The discovery involved spin theory, which is the basis of a theory of the structure of matter (25 April 1900 – 15 December 1958).
-
- 16 May 1830 - 185 years since Jean-Baptiste Joseph Fourier death**, was a French mathematician and physicist born in Auxerre and best known for initiating the investigation of Fourier series and their applications to problems of heat transfer and vibrations. The Fourier transform and Fourier's Law are also named in his honour. Fourier is also generally credited with the discovery of the greenhouse effect (21 March 1768 – 16 May 1830).
-
- 19 June 1925 - 90 years since Anghel Saligny death**, was a Romanian engineer, most famous for designing the Fetești - Cernavodă railway bridge (1895) over the Danube, the longest bridge in Europe at that time. He also designed the storage facilities in Constanța seaport (19 April 1854 – 17 June 1925).
